

# Say Goodbye To Grimy Tile & Stained Grout

**TILE & GROUT CLEANING**

What's the definition of an endless struggle? Cleaning tile and grout with regular commercial products.

Win the battle with Fresh Foam—we keep dirt out of your grout and make your tile shine!

## Most Tile & Grout Cleaning Just Skims the Surface - Fresh Foam Goes For The Deep Clean

Cleaning tile and grout is challenging. Abrasive cleaners can easily damage delicate surfaces yet aren't strong enough to remove the dirt trapped in porous grout.

That's why Fresh Foam developed an effective tile and grout cleaning process that uses a specialized hard-surface extractor to deliver deep-cleaning pressure washing to hard-to-reach areas while quickly absorbing the expelled water with a built-in high-grade vacuum.

## Benefits of Fresh Foam's Tile & Grout Cleaning Services

- ✓ Trained and IICRC-certified technicians perform a chemical compatibility test on the soiled surface to see how the tile materials react to the various cleaning solutions. This scientific approach allows us to determine which solutions are most effective.
- ✓ Don't worry about flooded floors! Our professional tools effectively clean trash areas, lobbies, gyms, restrooms, community rooms, basements or any tiled area without drainage.
- ✓ Suitable for various tile and flooring surfaces, including ceramic, porcelain, sealed concrete, marble, granite and stone.

**Improve Your Property's Appearance with Fresh Foam**
