Trash Chute & Trash Area Services

Trash Foam Treatment

On a recurring schedule, Fresh Focus expertly treats your trash chutes with our no-rinse Trash Foam, ensuring full coverage with a specialized foam spinner. We foam, scrape, and deodorize each chute door and compactor, leaving no detail overlooked. Our comprehensive service promises a thoroughly clean and odor-free environment from top to bottom.

Deep Clean Compactor Room

Fresh Focus's Deep Clean Compactor Room is an add-on service that power washes and vacuums floors and concrete block walls up to 5 feet. We secure the area and apply specialized cleaning agents before the power wash, ensuring a thorough deep clean. This meticulous process not only removes grime but also combats odors, maintaining a cleaner, fresher environment.

Door Restore

Fresh Focus offers an advanced Door Restore add-on service, utilizing high-temperature steam to deeply cleanse chute doors, going beyond our standard Foam Treatment. It's a comprehensive approach similar to auto detailing for your chute doors, with the Foam Treatment providing the foundational wash.

Dumpster & Bin Scrape Out

Fresh Focus delivers a deep clean by scraping dumpsters down to the bare metal and then treating them with our no-rinse Trash Foam. This meticulous process removes buildup and grime, ensuring cleanliness and deodorization.

Deep Clean Chutes

Fresh Focus provides a one-time deep cleaning service for chutes, employing the traditional powerwashing technique. This service is tailored for facilities with stainless steel chutes that have accumulated significant grime and have operational drains. It serves as an intensive cleaning to create a pristine baseline for ongoing recurring Foam Treatments.

Door Replacements

Fresh Focus specializes in replacing trash chute doors, ensuring they function correctly for inspections, odor management, and to address resident concerns. Should you have any broken doors, we are equipped to install new ones, maintaining the integrity and efficiency of your waste disposal system.
